

# Tufts Career Center FAQ of the Week

## Does the Career Center assist students who want to work for a year or two before attending graduate or professional school?

Definitely! We can help students research programs and prepare applications for fellowships, post-grad internships, year-long service programs, 1-2 year rotational programs -- and more! First, review the different resources on our website, available through the [Find a Job or Fellowship page](#). You'll notice that we have subpages dedicated to Fellowships and Gap Year Programs as well as Rotational Programs. Try to get a better sense of what sorts of short-term options are out there, and then [schedule an appointment with a Career Advisor](#) to continue your momentum.
