

**Are you interested in the field of public health?**

**Would you like to get paid for conducting groundbreaking research?**

**Are you curious to learn more about the Boston area?**

If you answered yes to any of these questions, please join us for an information session about summer research programs offered by The T.H. Chan School of Public Health at Harvard University. Alums from each program below will be present!

**Fostering Advancement and Careers through Enrichment Training in Science (FACETS)**

Fostering Advancement & Careers through Enrichment Training in Science (FACETS) is a six-week, interdisciplinary, research-intensive summer program hosted by The Office of Diversity and Inclusion within the Harvard T.H. Chan School of Public Health. FACETS offers a cadre of coursework, professional development, and networking opportunities to increase participants competitiveness for graduate school admission.

**Summer Program in Biological Sciences**

This intensive 8-week laboratory-based biological research program is for undergraduate students entering their junior or senior year in college. Interns apply state-of-the-art technology in their own research projects under the direction of a Harvard faculty member.

**Summer Program in Biostatistics and Computational Biology**

This six-week program introduces undergraduates to biostatistics, epidemiology, and public health research, with a focus on quantitative methods.

# Harvard T.H. Chan School of Public Health Summer Programs Alumni Panel Discussion

**Monday, February 12 | 6:00pm – 7:00pm (CST)**
