IN THIS MAJOR YOU’LL LEARN TO:

- Apply knowledge of mathematics, science, and engineering
- Design and conduct experiments, interpret and analyze data
- Design systems, components, and devices to meet engineering needs in light of functional, economic, environmental, social, political, ethical, health, safety, manufacturability, and sustainability constraints
- Function on multidisciplinary teams
- Identify, formulate, and solve engineering problems
- Use the techniques, skills, and modern engineering tools necessary for engineering practice

And so much more! Faculty and advisors are here to help you get the most out of your program and how it may apply to different career paths

WHERE MECHANICAL ENGINEERING MAJORS END UP

Research & Development
Graduate Studies
Management Consulting

Aerospace
Product Design
Manufacturing

Automotive
Government & Defense
Materials & Metals

Based on real UR student + alumni data!

WAYS TO TELL YOUR STORY:
Resources to help you tell your UR story!

- Your Greene Center advisor
- Resume + Handshake profile
- LinkedIn + Mel Collective profiles
- Practice interviews
- A flexible and evolving plan
- Talk to people! Friends, family, advisors, faculty, alumni... it will help you refine your story!

HOW TO BUILD THESE SKILLS:

- Get an on-campus job
- Take a skill development course
- Pursue an internship
- Conduct research with a faculty member
- Volunteer in the community
- Get involved in student organizations
- Do a virtual project
- Be curious and try new things

Not sure where to start?
The Greene Center can help!

TOP SKILLS EMPLOYERS WANT:

- Problem-Solving
- Teamwork
- Critical thinking
- Analyze + interpret data
- Adaptability + resiliency
- Written + verbal communication
- Ethical judgement + reasoning
- Intercultural fluency
- Creativity
- Leadership

A lot of people said so: World Economic Forum, McKinsey Consulting future of work report, National Association of Colleges + Employers, UR College Competencies

PREPARING FOR YOUR FIRST JOB + THE FUTURE OF WORK

apply knowledge of mathematics, science, and engineering
Design and conduct experiments, interpret and analyze data
Design systems, components, and devices to meet engineering needs in light of functional, economic, environmental, social, political, ethical, health, safety, manufacturability, and sustainability constraints
Function on multidisciplinary teams
Identify, formulate, and solve engineering problems
Use the techniques, skills, and modern engineering tools necessary for engineering practice
