

## Denison Internship Program Experiences

**Summer on the Cuyahoga (SOTC)** is Northeast Ohio's premier summer internship program for a select group of regional colleges and universities from Ohio, the East Coast, and the greater Midwest. Home to the Cuyahoga River, Cleveland is the focal point and gathering place each summer for 70-80 students from our nine partner schools.

The Knowlton Center provides support to Summer on the Cuyahoga to help cover the cost of each student, due to this financial support all SOTC participants are required to participate in the Denison Internship Program.

**Global Internship Experience** allows students to gain quality practical work experience abroad. Students will participate in a full-time, unpaid internship related to their career interests. The experience will immerse students in an international work experience and provide the development of intercultural awareness, problem-solving skills in a global context, and the development of peer and professional networks. Due to Denison's financial support of students participation in the program, students are required to participate in the Denison Internship Program.
