

EMPLOYER PARTNER PROGRAM 2023 - 2024

The Employer Partner Program is designed to maximize your organization’s recruiting effectiveness at San José State University. The benefits offered within each level have proven effective in creating positive brand awareness and visibility on campus. Beyond the benefits to employers, your partner program investment directly supports career education to foster student career success. During the 23-24 academic year, the Career Center will offer all the following events and services in-person or virtually, depending on the Santa Clara County Health Department and University guidance. Companies may work with the Career Center to customize their partner package should the listed services not be applicable to your company.
