Graduate School 58.3%
Employed 41%

99.3%
Success Rate for 2017

*Data collected in 2017 with an 84.2% response rate

We've built our advising process based on the idea that every experience you have can influence your academic journey and your career. The process of exploration, implementation and reflection is central to the idea of 360-degree advising. Each experience becomes a point of learning that helps you evaluate your development as a student and as a person; helps you understand your values, interests and goals; and helps you make informed choices about your academic and career options during your time here and beyond.

As your academic journey progresses, these experiences become the core of your professional story as well. Employers are looking for candidates who are not only academically accomplished, but who have real-world experience and have learned from that experience. And, if you find yourself in need of career advising and support after you enter the workplace, you can consult with a career professional dedicated to working specifically with alumni.

Our unique CAS360 Advising platform is the hub of this highly personalized, integrated approach to student advising that begins your first day on campus and continues throughout your entire college experience. CAS360 is a one-stop destination for resources that help you explore your options and work with your advisers to develop your plan.
