

ORGANIZATIONAL MANAGEMENT

MAJOR to CAREER MAP

How to Use This Map

Use the structure of the map to help you assess where you are and where you would like to go as you prepare for your professional career. The map offers suggestions; you don't have to do it all!

While you will learn a lot from your studies, take time to focus on other things that will help you be more competitive in your job search or graduate school applications. Get relevant experience outside the classroom, build your network, perform service and expand your contributions through leadership, and build the career management skills needed to find a job and move forward in your career.

Plan for Career Success

It is never too early to think about and plan for your future! Take the time to think about the skills you need to develop and experiences you need to have to prepare for your professional career, or move to the next level. Explaining your strengths and experiences with compelling examples will be an important step as you apply for jobs and further education. Use this map as a guide, and see the [Career & Professional Development website](#) for additional resources.

Build Skills and Experiences Employers Look For

Employers seek a variety of skills, knowledge and experience when hiring for professional roles. While specific needs vary by industry and employer, recent surveys* indicate the top skills they seek are as follows:

- 1 Strong oral and written communication skills
- 2 Ability to work in teams and collaborate
- 3 Ethical judgment and decision-making
- 4 Critical thinking and analytical skills

Employers also look for job-specific knowledge, relevant technology skills, and the ability to apply knowledge and skills to real world settings. These are learned through internships, volunteer leadership roles and relevant jobs related to your career interests.

Get the Help you Need

Mercy College provides you with a large number of support services from the time you enter the college through graduation. We offer a personalized learning experience that includes the College's Personalized Achievement Contract (PACT) program. PACT is a nationally recognized mentoring program that serves as a model for student success. Your PACT mentor is your point person who helps you navigate college life.

Mercy College promotes student learning and holistic development by offering programs and services that support students' academic development, inspire personal growth, and foster interpersonal connections and collaboration to prepare students for success in our diverse community and beyond. Check out the [Division of Student Affairs website](#) for available resources.

The Career and Professional Development team at Mercy College offers tools, training, and exposure to opportunities that empower our students to take ownership of their career success. Attend our events, career fairs and programs to learn and practice career skills, or see a counselor to get tips on finding internships or jobs, to practice interviewing, or to hone your professional resume. Our [website](#) also contains videos, resume formats and other useful tips to help our students prepare for their professional careers.

ORGANIZATIONAL MANAGEMENT

A PROGRAM FOR CAREER GROWTH

The Organizational Management degree program is a unique combination of courses in Business, Psychology and Sociology. The program requires a foundation of general education and open elective courses, followed by thirteen required major courses.

By the end of this program, students should be able to:

- Apply knowledge of management concepts and functions in an integrated manner

- Recognize and assess local, national, and global economic forces in the business environment
- Recognize and evaluate ethical issues in Organizational Management
- Construct and present effective oral and written professional communication
- Examine issues that affect their work and their organization

- Function effectively as team members and, where appropriate, as team leaders

Potential career paths for students who are studying Organizational Management at Mercy College include business, healthcare administration, public service, law, government, and human services.

Degree OPTIONS

Bachelor of Science
in Organizational Management

WHY STUDY ORGANIZATIONAL MANAGEMENT?

The program is an accredited, accelerated, degree completion program designed to accommodate working adults. The entire program is offered 100% online so students do not have to sacrifice their career for a degree. Most students join the program after earning an associate's degree.

Students participate in class through our online teaching platform, Blackboard, within a flexible time frame. Students can quickly advance through an accelerated semester schedule.

The flexibility of this program, and the diverse set of courses spanning Business, Psychology and Sociology, set this program apart from others. Our instructors include a diverse set of individuals within these varied fields able to provide students real time practical experience as well as contacts in the field. Students should make the effort to get to know their Professors so they can leverage these connections once they complete their degree.
