

STEPS

TO

CHOOSE A MAJOR

WHAT DO I WANT TO DO?

Complete the Traitify Assessment and review career matches. Explore career details using ONET.

What do you see yourself doing daily for work? For example, do you see yourself working in an office or in a lab doing experiments?

Conduct professional interviews with people working in the fields in which you are interested. Ask how they chose a major and how their major relates to their job(s).

Join a club/activity outside of classes/work to gain employability skills and learn about majors/careers.

Think about what classes you enjoyed in school. Review curriculum (list of required courses) for majors of interest.

Narrow down to a few broad fields. For example, "something where I can write" or "something in the social sciences".

Explore list of majors at EU to identify which align best with your interests. Speak to faculty in those programs to learn about the types of classes and careers.

Select a major and complete the Major Change Application for Undergraduate Students.
