CAREER CENTER  
Division of Student Affairs

*Your Destination,  
Your Future.*

The Career Center is here to help you find your academic/career path and equip you to successfully execute the transition from student to professional.

### Student Employment

On-campus jobs are available for all students; students who qualify for work study and those who do not. A host of workshops such as customer service training (CASA) and the Eagle Edge program are available to help students successfully navigate their employment experience. All available on-campus student positions can be found through the Eagle Careers website. In addition, at the beginning of each semester, the Career Center hosts a part-time job fair featuring on- and off-campus job opportunities.

### On-Campus Interviews

The Career Center has a dedicated interview suite consisting of 17 courtesy offices which employers utilize to host interviews for internships and full-time positions. Browse upcoming interview dates and apply for an interview on Eagle Careers.

### Career Fairs

Each semester career fairs are hosted. With so many employers concentrated in one convenient location, these fairs offer an efficient way to advance your job search. We recommend attending the Career Center seminars beforehand on career development strategies and job search techniques. Professional dress and resumes are required. Register for career fairs on the Eagle Careers website.

### Networking Events

The Career Center hosts networking events allowing students direct access to employers. Students have an opportunity to share their accomplishments and aspirations with employers and to solicit assistance with seeking employment. Browse and register for networking events on Eagle Careers.

### Eagle Careers

Eagle Careers is the private job bank of UNT, regularly updated with job listings for students and alumni posting both on- and off-campus opportunities. Log in to register for Career Center events and professional development sessions.

### Individual Advising

Your Career Development Specialist is assigned by academic college allowing familiarity with the changes in your field of interest. They can assist in helping you explore majors, build your resume, network, prepare for interviews, internships, and much more. Schedule an appointment with your Career Development Specialist on Eagle Careers powered by Handshake.

### Peer Advising

Are you a freshman or sophomore? Don't miss the opportunity to meet our Career Peer Ambassadors. They will assist you with finding a job on-campus, resume writing, and basic job search techniques. Peer-to-peer career advising can get you closer to achieving your career goals.

### Etiquette Workshop/Dinner

Connect with professionals over a 3-course meal while learning professional dining etiquette. Discuss academic and work experiences and network with professionals in your industry. Contact the Career Center for more information.

### Mock Interviews

Need interviewing preparation? Mock interviews are an excellent way to practice your interviewing skills, learn tips and techniques, and receive feedback. Career Development Specialists, alumni and employers dedicate their time to help with enhancing your skills. Contact the Career Center for more information.

### Internships

Students can gain valuable practical professional experience by participating in an internship prior to graduation. Internships help students to apply what they learn in the classroom to the actual work they may do after graduation. Interns have the opportunity to explore prospective occupations and employers, to help determine their desired occupational path. While not guaranteed, many students who participate in internships obtain a full-time job offer from their employer. To learn more, schedule an appointment with your Career Development Specialist.

### Take Flight

Take Flight is an experiential "job shadowing" program that lasts from one to a few days. Students have the opportunity to visit organizations throughout the DFW area and learn more about specific industries, organizations and career opportunities. For more information check the events section on the Eagle Careers website.

### Career Education Workshops

Workshops are held throughout the year covering topics such as Choosing a Major, Resume Preparation, Interview Techniques, Career Planning, Job Search Strategies, and many other professional development topics. View and register for workshops on the Eagle Careers website.
