

Wharton Undergraduate Class of 2015 Career Plans Survey Report

METHODOLOGY

Students were asked through several e-mail requests and follow-up phone calls to complete an online Career Plans Survey. Follow-up emails were sent between July – September 2015 to students who had not responded or who previously indicated they were “still seeking.” A total of 588 students completed surveys out of 642 graduates, resulting in a 92% response rate.

AVERAGE ANNUAL BASE SALARIES TREND

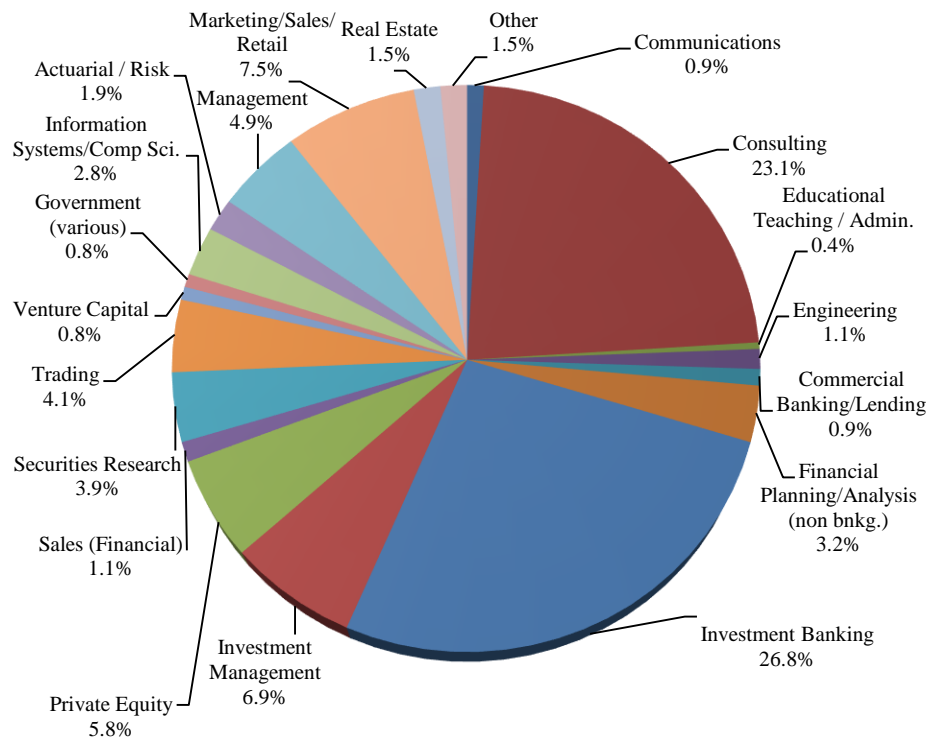

INDUSTRIES OF EMPLOYED GRADUATES

One of the most notable changes to this year's survey was the significantly higher average base salary students reported, increasing by \$6,725 over the base salary from 2014. This increase was largely due to the fact that most of the large financial firms raised their base salaries substantially, although other industries also saw more modest gains.

Financial and consulting firms hired the largest number of Wharton students again this year, but tech firms including Google, IBM, Amazon and Facebook also hired multiple Wharton students in 2015.

JOB FUNCTIONS OF EMPLOYED GRADUATES

Slightly over half of the Wharton Class of 2015 entered a financial job function, with the most popular being investment banking, investment management, private equity, securities research, and trading. Consulting increased in popularity as well this year, with 23.1% choosing it, up from 19.5% in 2014. Students also accepted more actuarial positions.

Fewer students accepted positions related to real estate, marketing/retail/sales, and information systems/computer science.

ANALYSIS OF EMPLOYED RESPONDENTS
